

## Wastewater and Potable Water Treatment Plants

Our main priority is to keep your water treatment plant working in optimal conditions. Whether it is preventive maintenance, calibration, or repairs, we offer expert help, professional services and a fast response to your business needs. Also, we can offer the option of maintaining your asset/equipment inventory for maintenance and calibration controls.

### Calibration, maintenance and repair of instruments installed on treatment plants:

- Open channel flowmeters, magnetic, venturi, ultrasonic, orifice plate among others.
- Pressure, differential pressure, vacuum and temperature indicators.
- pH meters, ORP, conductivity, chlorine, turbidity, dissolved oxygen and scales.
- Circular recorders (paper) and digital recorders (paperless) to record all the variables mentioned before.
- We have the capability to perform flow studies using data loggers that receive analog signals.

All our services are performed using International ISO9001 and ISO17025 Quality guidelines. Feel free to contact at [contactus@provensmart.com](mailto:contactus@provensmart.com) or 787.807.7877 us to discuss your needs and/or application.
